CENTURYPLY

CenturyPly is a market leader and has been a name to reckon with. As a bestseller in plywood, decorative laminates, and veneers, CenturyPly commands an undisputed superiority in the Indian market. The brand's constant explorations, transformation, and progress have led to a loyal customer base that looks up to the brand for its untiring efforts.

In 1986, two entrepreneurial trailblazers Mr. Sajjan Bhajanka and Mr. Sanjay Agarwal laid the foundation for Century Plyboards (India) Ltd. (CPIL). The enterprise creates millions in business, and garners the respect of several million more as happy customers with elegant homes.

CenturyPly is the numero uno choice of architects and interior designers who suggest the brand to the home-owners all across India. The brand and its proud ambassadors have been pivotal in the transformation of mundane structures into interesting properties with magnificence and coziness.

AN OVERVIEW

CenturyExteria comprises exterior-grade, designer, high-pressure laminates that make the exteriors of a building as inviting as its interiors.

CenturyExteria is a commitment to the best of exterior solutions in an assortment of designer shades, patterns, and solids. Exterior facades have a significant degree of influence on the longevity and efficiency of a building. The facades and their quality impact the room and building temperature, thereby reducing the energy consumption for cooling systems.

These uber cladding solutions from CenturyExteria are a proportionate mix of functionality, design optimization, and aesthetics. CenturyPly's own local manufacturing facility in India contributes tremendously to the brand's strong logistics systems, hence ensuring timely deliveries for tightly-deadlined projects. The beauty and strength of the designs have a significant role to play in creating a deeply impressionable plan, and CenturyExteria takes into account both of these elements, therefore helping you craft a design that is durable on multiple levels.

PANEL CONSTRUCTION

*Conditions apply

FEATURES

VENTILATED FACADE SYSTEM

CenturyExteria panel cladding is a ventilated facade system that eliminates moisture problems due to internal condensation of water, ensuring an improved comfort for indoors. The drainage of rainwater, entering through the ventilation gaps between panels, is carried out through the ventilation outlets. Another major benefit of CenturyExteria cladded walls is that they reduce the mechanical stress in the main structure; hence it is the most feasible solution for rehabilitation of aging building exteriors.

FIRE SAFETY

CenturyExteria panels have the property to reduce the fire spread intensity when it is exposed to fire and retain their stability for a long time. This has been tested and approved by authorised testing bodies in India and abroad. CenturyExteria products fall within one of the most authentic fire retardant class rating (Class-I), as per BS 476 part#7. This product has also secured Class A rating as per ASTM E84-13a Std., with a F.S.J. value as 15 & S.D.I. as 350.

TOUGH

The suitable modulus of elasticity, high tensile and flexural strength make CenturyExteria panels highly impact resistant. The homogeneity in the composition and density of the core ensure high pull-out strength for fixings or fasteners, which is especially important when the panel is invisibly fixed with anchors. Not only this, the dimensional stability and workability of CenturyExteria panels are comparable to those of hardwood. These can be easily processed, cut, sized, drilled and perforated. These are also not affected by moisture and are not susceptible to weathering or rot.

COLOUR STABILITY-OPTIMAL LIGHT FASTNESS

Colour Stability of the vertically applied decorative surface of CenturyExteria panels comply with the highest score classification- 5 measured with the grey scale according to EN 438-6. The colours of CenturyExteria panels would have a very minimal effect (almost no considerable shade fading) in the most severe climatic conditions, under direct contact of UV rays and even in heavily polluted industrial locations.

WEATHER PROTECTION

The specially designed weather-proof acrylic film on the both sides of the panels are invincible against heavy rains, storms, harsh sunlight, scarring dusts and ensure indomitable protection against UV rays.

TEMPERATURE RESISTANCE

CenturyExteria panels can withstand temperatures ranging from -20 c to +80 c, making it the most suitable exterior cladding option for any kind of climatic condition, whether it be chilling frosty weather or scorching heat.

ACOUSTIC RESISTANCE

CenturyExteria panels have ventilated facade systems which tend to influence the function of external noise reflection and behave as a sound insulating system (due to a high level of acoustic resistance of CenturyExteria panels), providing a considerable reduction in noise levels in commercial or institutional spaces like hospitals, office building, hotels and schools located in heavy traffic areas.

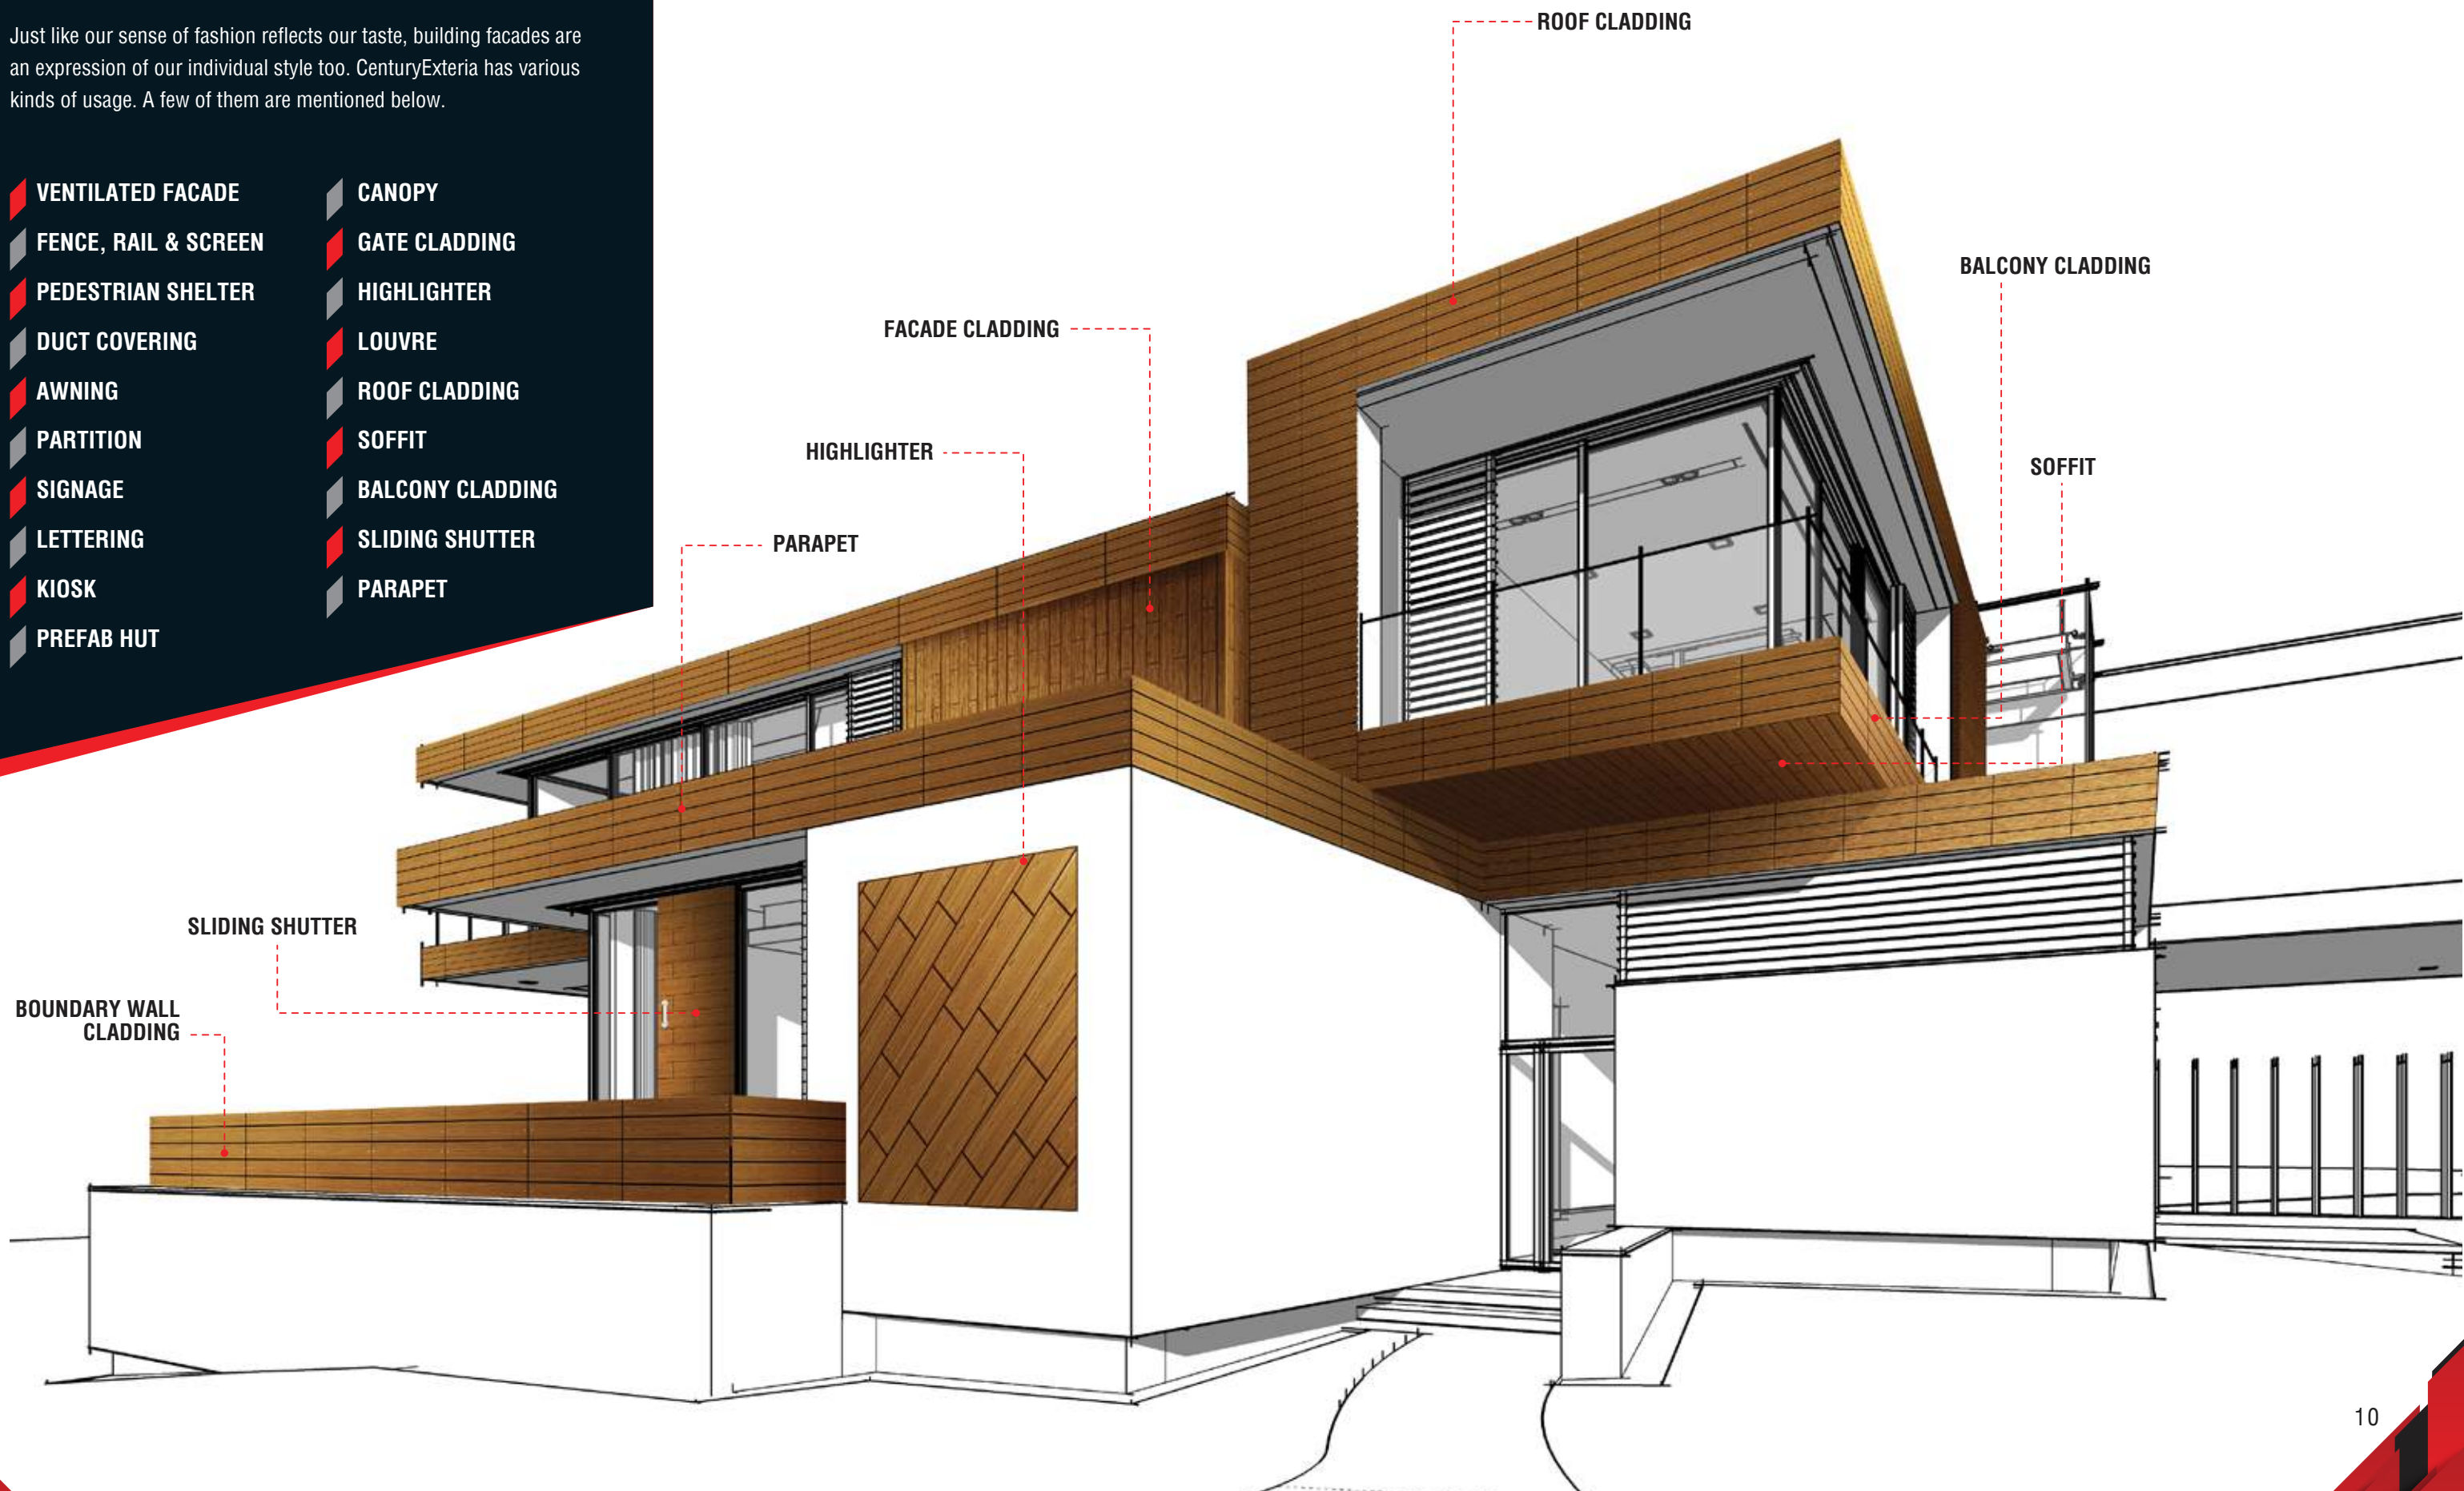

THERMAL INSULATION

Ventilated facade systems by CenturyExteria panels ensure natural ventilation and reduce the amount of heat that the building absorbs in hot weather. This helps in achieving a considerable reduction in air conditioning costs in summers, thereby proving to be an ideal exterior cladding solution with an attractively low payback period.

APPLICATIONS

Just like our sense of fashion reflects our taste, building facades are an expression of our individual style too. CenturyExteria has various kinds of usage. A few of them are mentioned below.

- VENTILATED FACADE
- FENCE, RAIL & SCREEN
- PEDESTRIAN SHELTER
- DUCT COVERING
- AWNING
- PARTITION
- SIGNAGE
- LETTERING
- KIOSK
- PREFAB HUT
- CANOPY
- GATE CLADDING
- HIGHLIGHTER
- LOUVRE
- ROOF CLADDING
- SOFFIT
- BALCONY CLADDING
- SLIDING SHUTTER
- PARAPET

& STONES

Are you a fan of Mother Nature? It is time to weave in the natural beauty with your vision and design. Woodgrain facades help you get the rustic beauty of wood trunk and the robustness of stones to the exteriors of the construction of your dreams.

Taking inspiration from the blocks of monotone hues, Solids lend proportions and an element of vastness to structures that would have otherwise looked visually weightless. This is a significantly perceptible way to add uniqueness and robustness at the same time.

SYSTEMS

ADHESIVE FIXATION SYSTEM

STEP 1

Assembling of M.S. galvanized bracket and fasteners on load bearing structure.

STEP 2

Assembling of S.S. nut bolt to lock aluminium extrusion from M.S. galvanized bracket and application of recommended primer.

STEP 3

Application of recommended P.U. adhesive and VHB tape on primed surface of aluminium extrusion.

STEP 4

Panel fixing on aluminium frame.

RIVET FIXATION SYSTEM

STEP 1

Assembling of M.S. galvanized bracket and fasteners on load bearing structure.

STEP 2

Assembling of S.S. nut bolt to fix aluminium extrusion with M.S. galvanized bracket.

STEP 3

Detail of fixed point and sliding points on the panel.

STEP 4

Fixing of coloured aluminium rivet on the panel.

OTHER FIXATIONS

Undercut concealed fixation

Undercut concealed fixation with joint connector

'h'-clip concealed fixation

Overlap fixation

Rainwater drainage fixation

Shiplap fixation

Duct cladding

Louvre cladding

GALLERY

CenturyExteria has undertaken and delivered some of the best projects in the commercial and residential sectors. CenturyExteria has brought about a noteworthy transformation in both, the structures they are used in, and the landscape of the area.

STORAGE & HANDLING

- Store in a dry, clean, frost-free room.
- CenturyExteria HPL sheets must be stacked horizontally.
- A levelled surface which can provide full and uniform support to the pallets on which CenturyExteria HPL sheets will be placed during storage, should be made available.
- Dirt, dust or any abrasive material in any form must always be avoided on or between CenturyExteria HPL sheets.
- Store CenturyExteria HPL sheets in the original, closed packaging wherever possible.
- Do not place any moisture-sensitive separator layers between the CenturyExteria HPL sheets. If required, use plastic sheets as intermediate layer.
- Treat CenturyExteria HPL sheets with care. Suitable protective hand gloves must always be worn while handling.
- CenturyExteria HPL sheets should not be slid over another or pushed/pulled over edge while they are being carried or loaded. During transportation always lift the sheets.
- The peel off film should be ideally removed within 14 days of installation of the panels.

CARE & MAINTENANCE

- CenturyExteria HPL panel surfaces can be cleaned with a damp cloth and mild detergent (baby shampoos, liquid dish washing detergents, liquid soaps etc.). After cleaning, a thorough rinsing and drying is required.
- Any kind of abrasive cleaner, powder, scouring pad, steel wool, chisel, sandpaper, brush having hard rigid bristles etc. should never be used; this can leave permanent scratch marks on the laminate and irreversibly damage the finish.
- Don't use any strongly acidic or alkaline based solvent, bleach, heavily chlorinated product or furniture polish as cleaning agent; these agents can discolour the UV protective film on the panel.
- Solvents having polyurethane lacquer, paint thinner and nail polish remover must not be used, as these solvents can have adverse effects on the UV protective film.

Note: Any kind of improper or incorrectly performed cleaning will make the warranty void.

GREEN CREDENTIALS

CERTIFICATIONS OF COMPLIANCE

CENTURY PLYBOARDS (INDIA) LIMITED

CenturyLaminates Exterior Grade Compact

Certificate Number
17649-410

Status
Certified

UL 2818 - 2013 Standard for Chemical Emissions for Building Materials, Finishes and Furnishings

Building materials are determined compliant in accordance with an Office environment with an air change of 0.68 hr-1 and a loading of 3.20 m2. Products tested in accordance with UL 2821 test method to show compliance to emission limits in UL 2818, Section 7.1

Environment

UL Environment investigated representative samples of the identified Product(s) to the identified Standard (s) or other requirements in accordance with the agreements and any applicable program service terms in place between UL Environment and the Certificate Holder(collectively "Agreement"). The certificate Holder is authorized to use the UL Environment Mark for the identified Product(s) manufactured at the production site(s) covered by the ULE Test Report, in accordance with the terms of the Agreement. This Certificate is valid for the identified dates unless there is non-compliance with the Agreement.

The mark of responsible forestry
