about  
US

INDOBOND welcomes you to the world of Aluminium Composite Panels (ACP) where phenomenal quality meets incomparable durability. We take utmost pride in introducing ourselves as the leading manufacturers of ACP sheets in India. ACP was first introduced in India in the year 2000 under the visionary leadership of Mr. Subhash Jain, M/s. Indomax Industries established in Bhagwanpur, Roorkee, has given the construction industry new dimensions and opened new opportunities.

Since inception, INDOBOND has grown by leaps and bounds and is the front runner of the market. Our products are feast for your eyes and will dissipate you in your wishful dream décor spaces.

The **Motto** of INDOBOND is to attain perfection, therefore with a view to achieve the desired goal INDOBOND have set up a world class innovative manufacturing unit, with state-of-the art fully computerized and digitized with advanced level of super wide, continuous and high-speed production lines.

There is no gainsaying the fact that our **Vision** is to deliver the INDOBOND ACP which is the symbol of excellence in terms of utility and appearance as to maintain cordial relations with clients and staff, thus adhering to work ethics.

Our **Mission** is to provide up-to-date and innovative product range and earn trust of our customers with our services, timely delivery of high quality products blended with high aesthetic appeal. Our ultimate aim is to earn a long and strong trust to build brand image and maintain our fame. We are known for our integrity. INDOBOND Group is reputed to use clean and eco-friendly technology free from any detrimental effect to air, water and environment.

INDOBOND fabricates exclusive products under close monitoring by experienced and qualified specialists and engineers with the latest infrastructure and paraphernalia being our determinative factor.

INDOBOND ACP sheets are one of the most popular sustainable materials that are used widely throughout the world. They are sandwich panels comprising of two aluminium sheets bonded to an organic mineral filled inner core material which could be of high density or low density. The light weight, aesthetics, good acoustic properties, fire rated properties easy installation and very low wastage make it the material of today.

INDOBOND ACP sheets are highly resistant to acids, alkalis, pollution and has very good sound and heat insulation properties. It also helps in energy conservation by the building as per the ECBC code hence contributing towards environment.

INDOBOND also facilitates ALUXURY Royal PVC Laminates and ALUXURY Royal UV Marbled hence now launching the new generation 90 degree bendable laminates and marble sheets with mesmerizing designs that will enliven your dream spaces like never before. INDOBOND has also recently introduced luxurious and innovative CLICK FLOORINGS with revolutionary self-attaching system. So easy to install and termite, fungus and bacteria free, it is what you always want to step on each time you lay down your foot on the floor.

Give your space that vivacity, express it with INDOBOND.

### Why Us?

INDOBOND ACP is the premier choice designed for ones who don't compromise on quality and aesthetics. So we urge you to extend your imagination and paint that mental picture with our exclusive INDOBOND ACP sheets. We have pan India distribution network and timely delivery is our habit.

With a wide line-up of  
**Colours & Textures**

Indobond opens doors to unlimited creativity

*Let's your imagination...fly*

## HPL (High Pressure Laminates)

HPL, is the best replacement of wood & marble being used for exteriors of our home and commercial buildings. It is considered to be one of the most durable decorative surface material and its available with special performance properties including chemical, fire and water resistant powered by research & development team. Recently, we developed metal based HPL's with 6mm thickness which is perfectly suitable for extreme & completely unpredictable Indian weather. These Metal based HPL's are getting widely used in miscellaneous fields due to its excellent mechanical & physical performance making it as one of the most popular material in various application area.

### Fire Retardant

Indobond is composed of a fire-retardant core sandwiched between two skins of aluminium. The core consists of minimum 70% of non-combustible minerals. Indobond is also comparatively lighter than solid aluminium panels.
